

# Takahiro Fujii ( 藤井貴浩 )

## Objective

Seeking a position as an engineering manager or software engineer in an organization where I can demonstrate my technical skills and leadership of the organization and growth.

## Summary of Qualifications

- SPA development experience(React, Redux)
- Leading international organization(10+ countries, 30+ members, 4teams)
- Extensive experience for leading front-end / back-end / native app / full-stack organization
- Experience of global(i18n, l10n) application development
- Design architecture for client(web, native)
- Web API development experience(Spring Boot)
- Skills for recruitment(Especially not Japan) / training / 1 on 1
- <https://corp.rakuten.co.jp/careers/interview/takahiro/>

## Technical Skills

Language: Javascript, Java, HTML, CSS(Less,Sass), SQL

Frameworks, Libraries: React, Redux, Node.js, Spring Boot

Testing: Jest, Enzyme, JUnit

Middleware: Apache Tomcat, Oracle, mysql, mongoDB, redis, hazelcast

CI: Jenkins, Ansible

Infra: Private IaaS, PaaS

Monitoring: New Relic, Fabric, Jennifer, Zipkin, Grafana

Few experience : Vue, Nuxt, Next, Kotlin, Swift, AWS

## Education

2010 Bachelor of Tokyo University of science, Mathematical information science

## Miscs

- Lecture at Tokyo University of Science
- Contribute an article for 「科学フォーラム」
- Made Line stickers
- Member of Designers lab as a designer <https://goodpatch.com/blog/designers-gym/>
- Member of Ishijima lab as a designer <https://bosyu.me/users/woopsdez/wants/14598>
- Took part in several hackathon

## Professional Experience

Rakuten Inc(2010/Apr ~ 2019/Dec)

---

**Engineering Manager**

**2019/01~**

**Rakuten Travel Innovation Section , FrontEnd Group**

**30 over engineers with 5 Leaders**

- Lead and manage Front-End team and Native application team(ios / android) build new global application to make an innovation for travel industry
  - Carrer development / 1on1 / Goal, Action plan setting
  - Implement prototype to review architecture, requirement and so on.
  - Design organization to accelarate development be more self-organized
  - Define mission/vision of Front-End group and ingrain in each member's mind
  - Discuss with designer's to make ui components with atomic design policy
- 

**Engineering Manager / FrontEnd Engineer**

**2018/04 ~**

**over 20 engineers**

Design and implement new rakuten travel global platform.

As a front-end engineer, I mainly contributed consumer web application with React/Redux.

- Clarify requirement, feasibility with Product manager, QA and other stakeholders
  - Design/Implement user booking/change/cancellation flow
  - Design/Implement login/authentication and other features
  - Design/Implement generic ui component(like a material design) as library
  - Design/Implement i18n/l10n features like a term, date, price, name, address
  - Design/Implement html email template with SPA
  - Design microservice architecture with other stakeholders
  - Design/Discuss/Review with web front-end engineer and ios/android engineer to unify concept of i18n/l10n
- 

**Engineering Manager for native application team(ios / android)**

**2017/07 ~ 2018/4**

**8 engineers**

Design and support to implement new native application and maintain applications.

- Design API interface
- Review architecture
- Clarify requirement with Product manager, QA engineer and other stakeholders
- Implement stab api application for support native application implementation
- Triage / Investigate bug fix

---

**FrontEnd Engineer**

**2016/5 - 2016/7**

- To implement 1st single page application in Rakuten Travel as POC with React/Redux.
- Implement map, phamplet registration page etc.

---

**Backend Engineer, Team manager for hotel, booking service  
with 10 engineers**

**2014/10 - 2017/06**

- Lead / Manage team development
- Design / implement several apis regarding booking, payment, monolith application, library with Java and Spring boot.
- Evangelize spring framwork eco-system to enhance our platform.(Spring REST Docs, Spring Session, Spring Cloud Sleuth, Spring Cloud Config, Spring Initalizr, Spring Boot Actuator, and so on.)

**Refference**

(Jpn)

<https://www.slideshare.net/241takahiro/spring-onewebdocument>

---

**Web application engineer for international business**

**2010/04 - 2014/09**

- Develop many products/system/batch with Java.
- Admin application for international hotel, Outboud hotel reservation site, Inbound system, invoice system, reservation api, connectivity with other large hotel chain and so on.

## Other Projects / Roles / Responsibilities

- Email Verification Project
- API Integration with 3rd party, other travel company.
- Mail Magazine system development.
- Tax & Fee related development.
- Integrate Direct contracted / China subsidiary contracted / Korea subsidiary contracted hotel
- Rate calculation related project.
- Integration system, api with outside company.
- Cancel Policy related development.
- Onboard tutorial for new employee, internship student.
- Presentation for students to explain our work.
- Lecture at University.
- Define tech organization vision / mission based on value proposition.
- Evaluate engineer.
- Hire/Interview engineer.
- HTTPS migration.
- Triage BUGs.
- System renewal for inbound project
- Data encryption

## Qualification

- TOEIC 805
- BATIC( bookkeeper )

## Other

- github : taka66
- portfolio site : <https://takahirofujii.dev>
- take part in several hack-a-thon
